

Fleet Electrification Support

evfleetworld  **2023**
THE GREAT BRITISH FLEET AWARDS

Innovation in Electric Vehicles
◀ **Co Charger** ▶

What can Co Charger do for your fleet?

- Electric vehicles kept at homes with no driveway can be charged while the driver is at home and off duty
- Drivers book and use a neighbour's charger as their "home" charger
- Simple, free app with back-office support and reporting
- UK's second-biggest EV charging network – and growing fast
- Free, easy pilot service

How does Co Charger work?

- >10 private chargers for every public one, most with <5% utilisation.
- Co Charger enables those with EV chargers to rent them to neighbours who can't have them
- Matches pairs within walking distance of each other
- Searching, booking, reminders, charging and payments all managed in app
- Facilitates an easy, simple, ongoing arrangement between neighbours

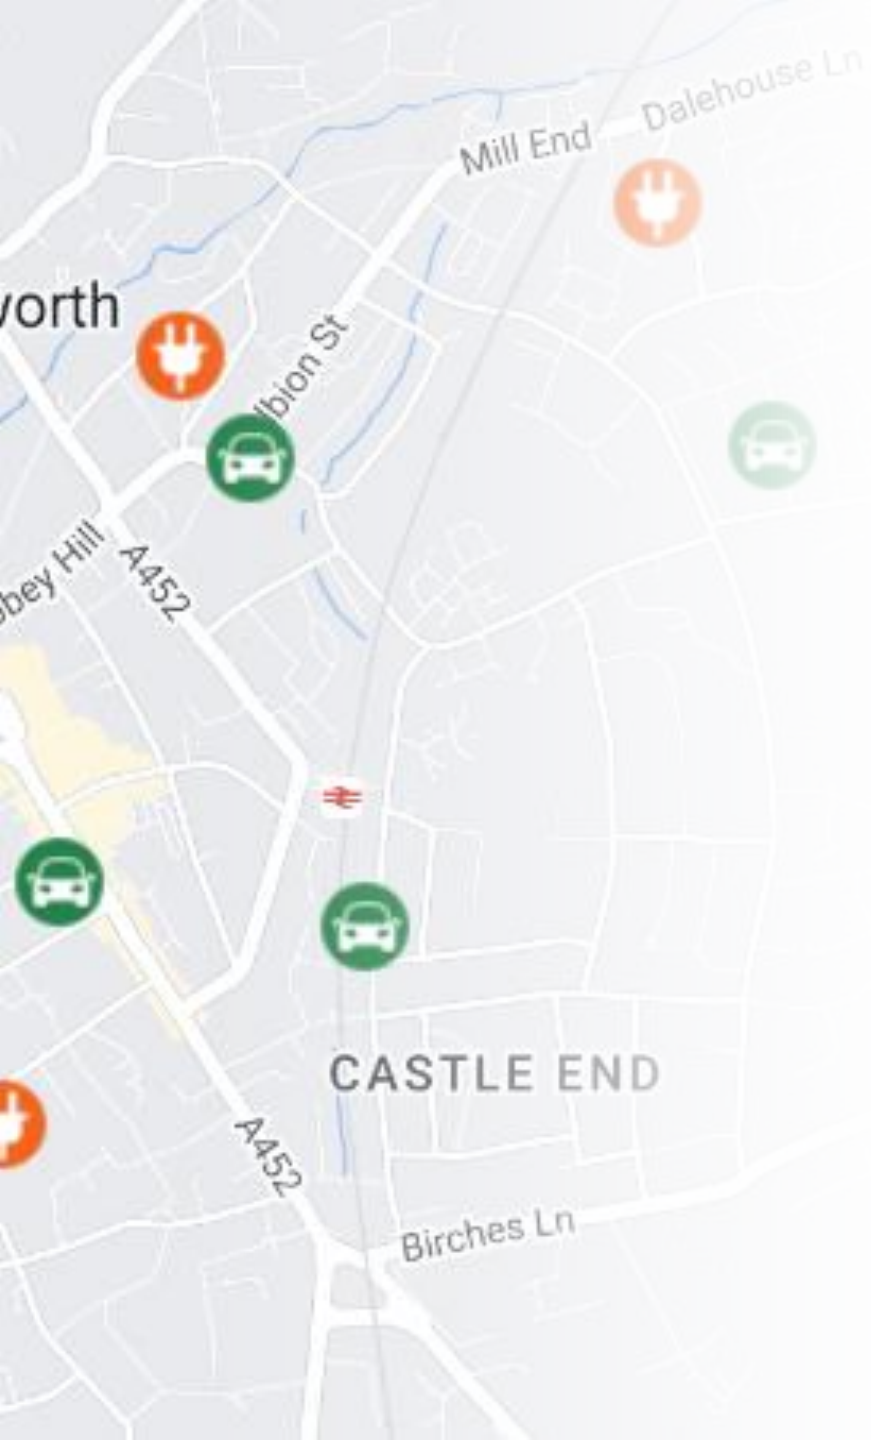

Benefits

- More vehicles charged while driver is at home
- Reduced need for public charging
- Bookable and dependable
- Cheaper on average than public charging
- Improved operational predictability
- Accelerated decarbonisation

**A free, easy service with
big, immediate benefits.**

Simple, free pilot service

All you need to provide:

- EV fleet driver postcodes
- Appropriate impetus for the pilot drivers to participate.

Co Charger does the work:

- Identifies a small group of your EV drivers to use the service for a two-month period
- Creates accounts and pre-qualifies nearby Hosts
- Helps drivers get up and running
- Provides data and feedback to the fleet operator.

Then what?

- Pilot results, feedback and recommendations
- Analysis to facilitate full roll-out and ongoing EV allocation.
